

# Linkages

ARTICLE

The screenshot shows the 'Search linkages' page in the habbl application. The interface is divided into a sidebar on the left and a main content area. The sidebar contains navigation links under 'START' (My profile, Company profile, FTP account, Linkages, Device versions, User) and 'PRIVACY' (Privacy-Contract). The main content area features a search bar (2) with a search icon and a search button. Below the search bar are two buttons: 'SEND REQUEST' (3) and 'MESSAGES TO GROUPS' (4). A filter section (5) is located below the buttons, showing 'FILTER RESULTS BY' with 'STATE (5)' and 'GROUPS (0)' options, and a 'RESET FILTER' button. The main content area displays a table with columns: 'SOURCE MEM...', 'TARGET MEMBER', 'REFERENCE NU...', 'ALIAS', 'GROUPS', 'AUTO ACCEPT', 'RELATION', 'ACTION', 'USER IDENTIFIC...', and 'STATE' (1). The table is currently empty, showing 'No Rows To Show'.

1. If you select the menu item 'Linkages' within the administration area, you will have a list of all habblApp users and linked companies in your company account. This list contains information about the connection and linkage settings. If you click on one of the lines in the list view, you get to the detail view of an individual user.
2. You can **search** for specific users in this list view via the search bar. Simply enter the name of the user you are looking for here.
3. You can **send a request** to a driver or other companies via the button.
4. If you have defined a group, you can **send a message** to the driver of this group here.
5. Here you can **filter** the results by different **states** or **groups**.
