## User tab, detail information and roles

- For every user that you select in the list a new user tab is being opened. This way you can switch between different users which you are inspecting at the moment. You can find the user tabs in the left corner at the bottom of the screenshot above.
- By clicking on the "EDIT" button you can edit user details and roles. We will have a deeper look at editing roles in the following articles.
- **Remember: You can not change the roles of your own user!**
